

I benefit from listening to XM Satellite Radio and its traffic and weather channels. The satellite radio provides variety and quality that are not available elsewhere, the terrestrial radio has limits that are not conducive for an Over the road truck driver, by the time the weather comes on I am out of range. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve.
